

Maple Furniture

Luxury Cabinetry Collection

Modern Kitchen Systems & Custom Millwork

OUR STORY

Crafted for the Modern Home

Maple Furniture was founded on a singular belief: that every kitchen deserves the precision of a craftsman and the vision of a designer. From frameless European systems to classic American face-frame cabinetry, we engineer spaces that endure.

Every cabinet that leaves our facility reflects our commitment to flawless joinery, premium materials, and finishes that age with grace.

Our Mission

To deliver precision-engineered cabinetry that elevates everyday living through superior craftsmanship and timeless design.

BRAND PILLARS

The Maple Furniture Standard

Six principles define every cabinet we make — from the first design sketch to final installation.

Craftsmanship

Old-world joinery meets modern precision. Every joint, every edge, every finish is executed with uncompromising attention to detail.

Material Selection

We source only premium solid woods, architectural veneers, and high-grade MFC panels — chosen for beauty, stability, and longevity.

Manufacturing Capability

State-of-the-art CNC production lines and a skilled craftsman workforce ensure scalable quality for projects of any size.

Precision Engineering

Tight tolerances, consistent dimensioning, and engineered structural integrity define every unit we produce.

Design Flexibility

Custom sizing, bespoke configurations, and an expansive finish portfolio ensure every project is truly one of a kind.

Premium Finishing

Multi-stage finishing systems — from clear veneer coats to matte lacquers — deliver a surface quality that speaks for itself.

Two Systems. One Standard of Excellence.

Maple Furniture offers two distinct cabinet construction philosophies, each engineered for specific design visions and installation environments.

FRAMELESS — European System

The frameless (full-access) system eliminates the face frame, allowing doors and drawers to cover the full cabinet opening. The result is a sleek, contemporary aesthetic with maximum interior access.

- 3/4" (18mm) melamine carcass construction
- Concealed soft-close European hinges
- Full-extension soft-close drawer slides
- 1/2" (12mm) back panel for rigidity
- Adjustable leveling legs
- Melamine-lined interior in matching finish

FACE-FRAME — American System

The face-frame system attaches a solid hardwood frame to the front of the cabinet box, providing a traditional aesthetic, enhanced structural rigidity, and a classic reveal profile favored in transitional and traditional kitchens.

- Solid hardwood face frame construction
- Overlay or inset door configurations
- Dovetail or dowel drawer box joinery
- Soft-close hinge integration
- Plywood or MFC carcass options
- Consistent reveal for refined detailing

Engineering the Interior

Every component within a Maple Furniture cabinet is specified for performance and longevity. From carcass material to hardware, each element is deliberately chosen.

	Soft-Close Hardware Blum and premium-grade concealed hinges with integrated soft-close damping. Doors close silently, every time, for a lifetime of use.
	Adjustable Shelving Shelf pin systems allow for configurable interior storage. Shelves are adjustable in 32mm increments to suit any storage requirement.
	Premium Veneer Finishes Real wood veneer faces in White Oak, Walnut, Maple, and Birch — sliced and applied for consistent grain direction and matched panel appearance.
	Melamine Interiors Clean, durable, and moisture-resistant melamine liners are standard in all carcass interiors — available in White and matching wood tones.
	Plywood vs MFC Options Choose between moisture-resistant MFC (melamine-faced chipboard) for standard applications or premium plywood carcasses for superior structural performance.
	Moisture-Resistant Construction All carcass materials carry moisture-resistant treatment. ABS edge banding seals all exposed edges to prevent delamination in humid environments.

DOOR STYLES & FINISHES

Your Vision. Our Craft.

Maple Furniture offers a comprehensive range of door profiles and finish options — and beyond the standard collection, we can manufacture to any door style or finish specification the client requires. Whether it's a custom profile, a bespoke color, or a specific veneer, our production capability is built to deliver it.

FINISH COLLECTIONS

The Natural Wood Collection

Four of nature's finest hardwoods. Each species offers a distinct character — from the rich drama of Walnut to the clean serenity of Maple. All veneers are finished with a premium clear coat system to protect and enhance the natural grain.

White Oak

Strong and durable with a prominent grain pattern and a warm, natural look.

Walnut

Rich and luxurious with deep color variation and elegant, flowing grain.

Maple

Smooth and even with a fine grain, offering a clean and modern appearance.

Birch

Light and consistent with a subtle grain, ideal for a minimal and natural aesthetic.

White Oak

Strong and durable with a prominent grain pattern and a warm, natural look. A favored choice for modern and transitional kitchens.

Walnut

Rich and luxurious with deep color variation and elegant, flowing grain. A signature species for high-end contemporary interiors.

Maple

Smooth and even with a fine grain, offering a clean and modern appearance. Hard, stable, and works beautifully in any design.

Birch

Light and consistent with a subtle grain, ideal for a minimal and natural aesthetic. Strong and consistent with smooth, even grain.

#MP.010 – Shaker Door — Natural Wood Species

The Shaker door profile is one of the most enduring and versatile in cabinetry design. Its clean recessed panel and simple rail-and-stile construction complement both contemporary and transitional kitchen aesthetics. Available across all four natural wood species.

DESIGN STYLES OVERVIEW

A Style for Every Vision

From the clean restraint of a full slab door to the architectural detail of a cathedral raised panel, Maple Furniture offers a comprehensive palette of door profiles — each available across our full material and finish range.

Our standard veneer collection features White Oak, Walnut, Maple, and Birch — complemented by a painted color range in White, Gray, Dark Blue, Dark Green, Light Blue, and Black. For projects requiring a specific wood species or custom veneer or painted color, our production team can accommodate bespoke material requests.

CABINET COLLECTION

Standard Sizes. Custom Possibilities.

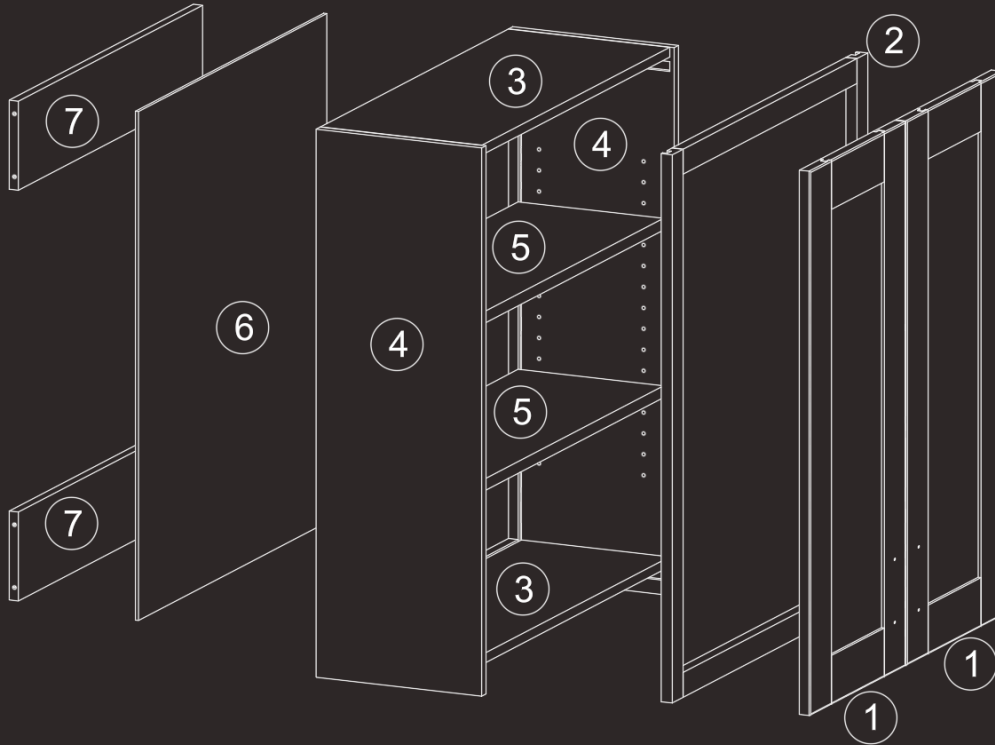

Maple Furniture offers a comprehensive range of wall and base cabinet configurations — each available in standard dimensions to streamline specification and installation.

Beyond the standard collection, our team can engineer custom cabinet sizes and configurations to meet any project requirement.

PRODUCT COLLECTION — FACE-FRAME

Face-Frame Construction

Built in the tradition of fine American cabinetry, Maple Furniture's face-frame cabinets feature solid wood frames attached to the cabinet box — providing a larger door reveal and a classic, refined aesthetic.

TECHNICAL CAPABILITY

Precision at Every Stage

Our manufacturing facility is engineered for precision, consistency, and scale. Every process — from raw material intake to final quality inspection — is controlled to deliver cabinets that meet the highest performance standards.

Material Intake & Grading

All solid wood, veneer, and panel materials are graded and inspected upon arrival. Only materials meeting our strict specification are accepted into production.

CNC Panel Processing

State-of-the-art CNC machining centers cut, route, and drill all carcass panels to ± 0.1 mm tolerance. Consistent, repeatable, and scalable.

Edge Banding & Assembly

Automated edge banding lines apply premium ABS edge tape to all exposed panel edges. Assembled carcasses are checked for square and dimension.

Door Finishing & Coating

All doors pass through our multi-stage finishing booth — sanding, primer, color coat, and topcoat. Each door is inspected for surface quality before packaging.

Quality Control & Dispatch

Final QC inspection checks every unit for dimension, finish, hardware function, and packaging integrity before shipment approval.

TECHNICAL CAPABILITY

Hardware & System Integration

Maple Furniture integrates premium hardware systems from leading European manufacturers. Every hinge, drawer slide, and lift mechanism is specified for function, longevity, and a premium user experience.

Soft-Close Hinges

Concealed cup hinges with integrated soft-close damping. Doors close silently from any angle with consistent, controlled deceleration.

Full-Extension Drawer Slides

100% extension soft-close drawer runners with push-to-open or handle options. Rated for 50kg per drawer for demanding kitchen environments.

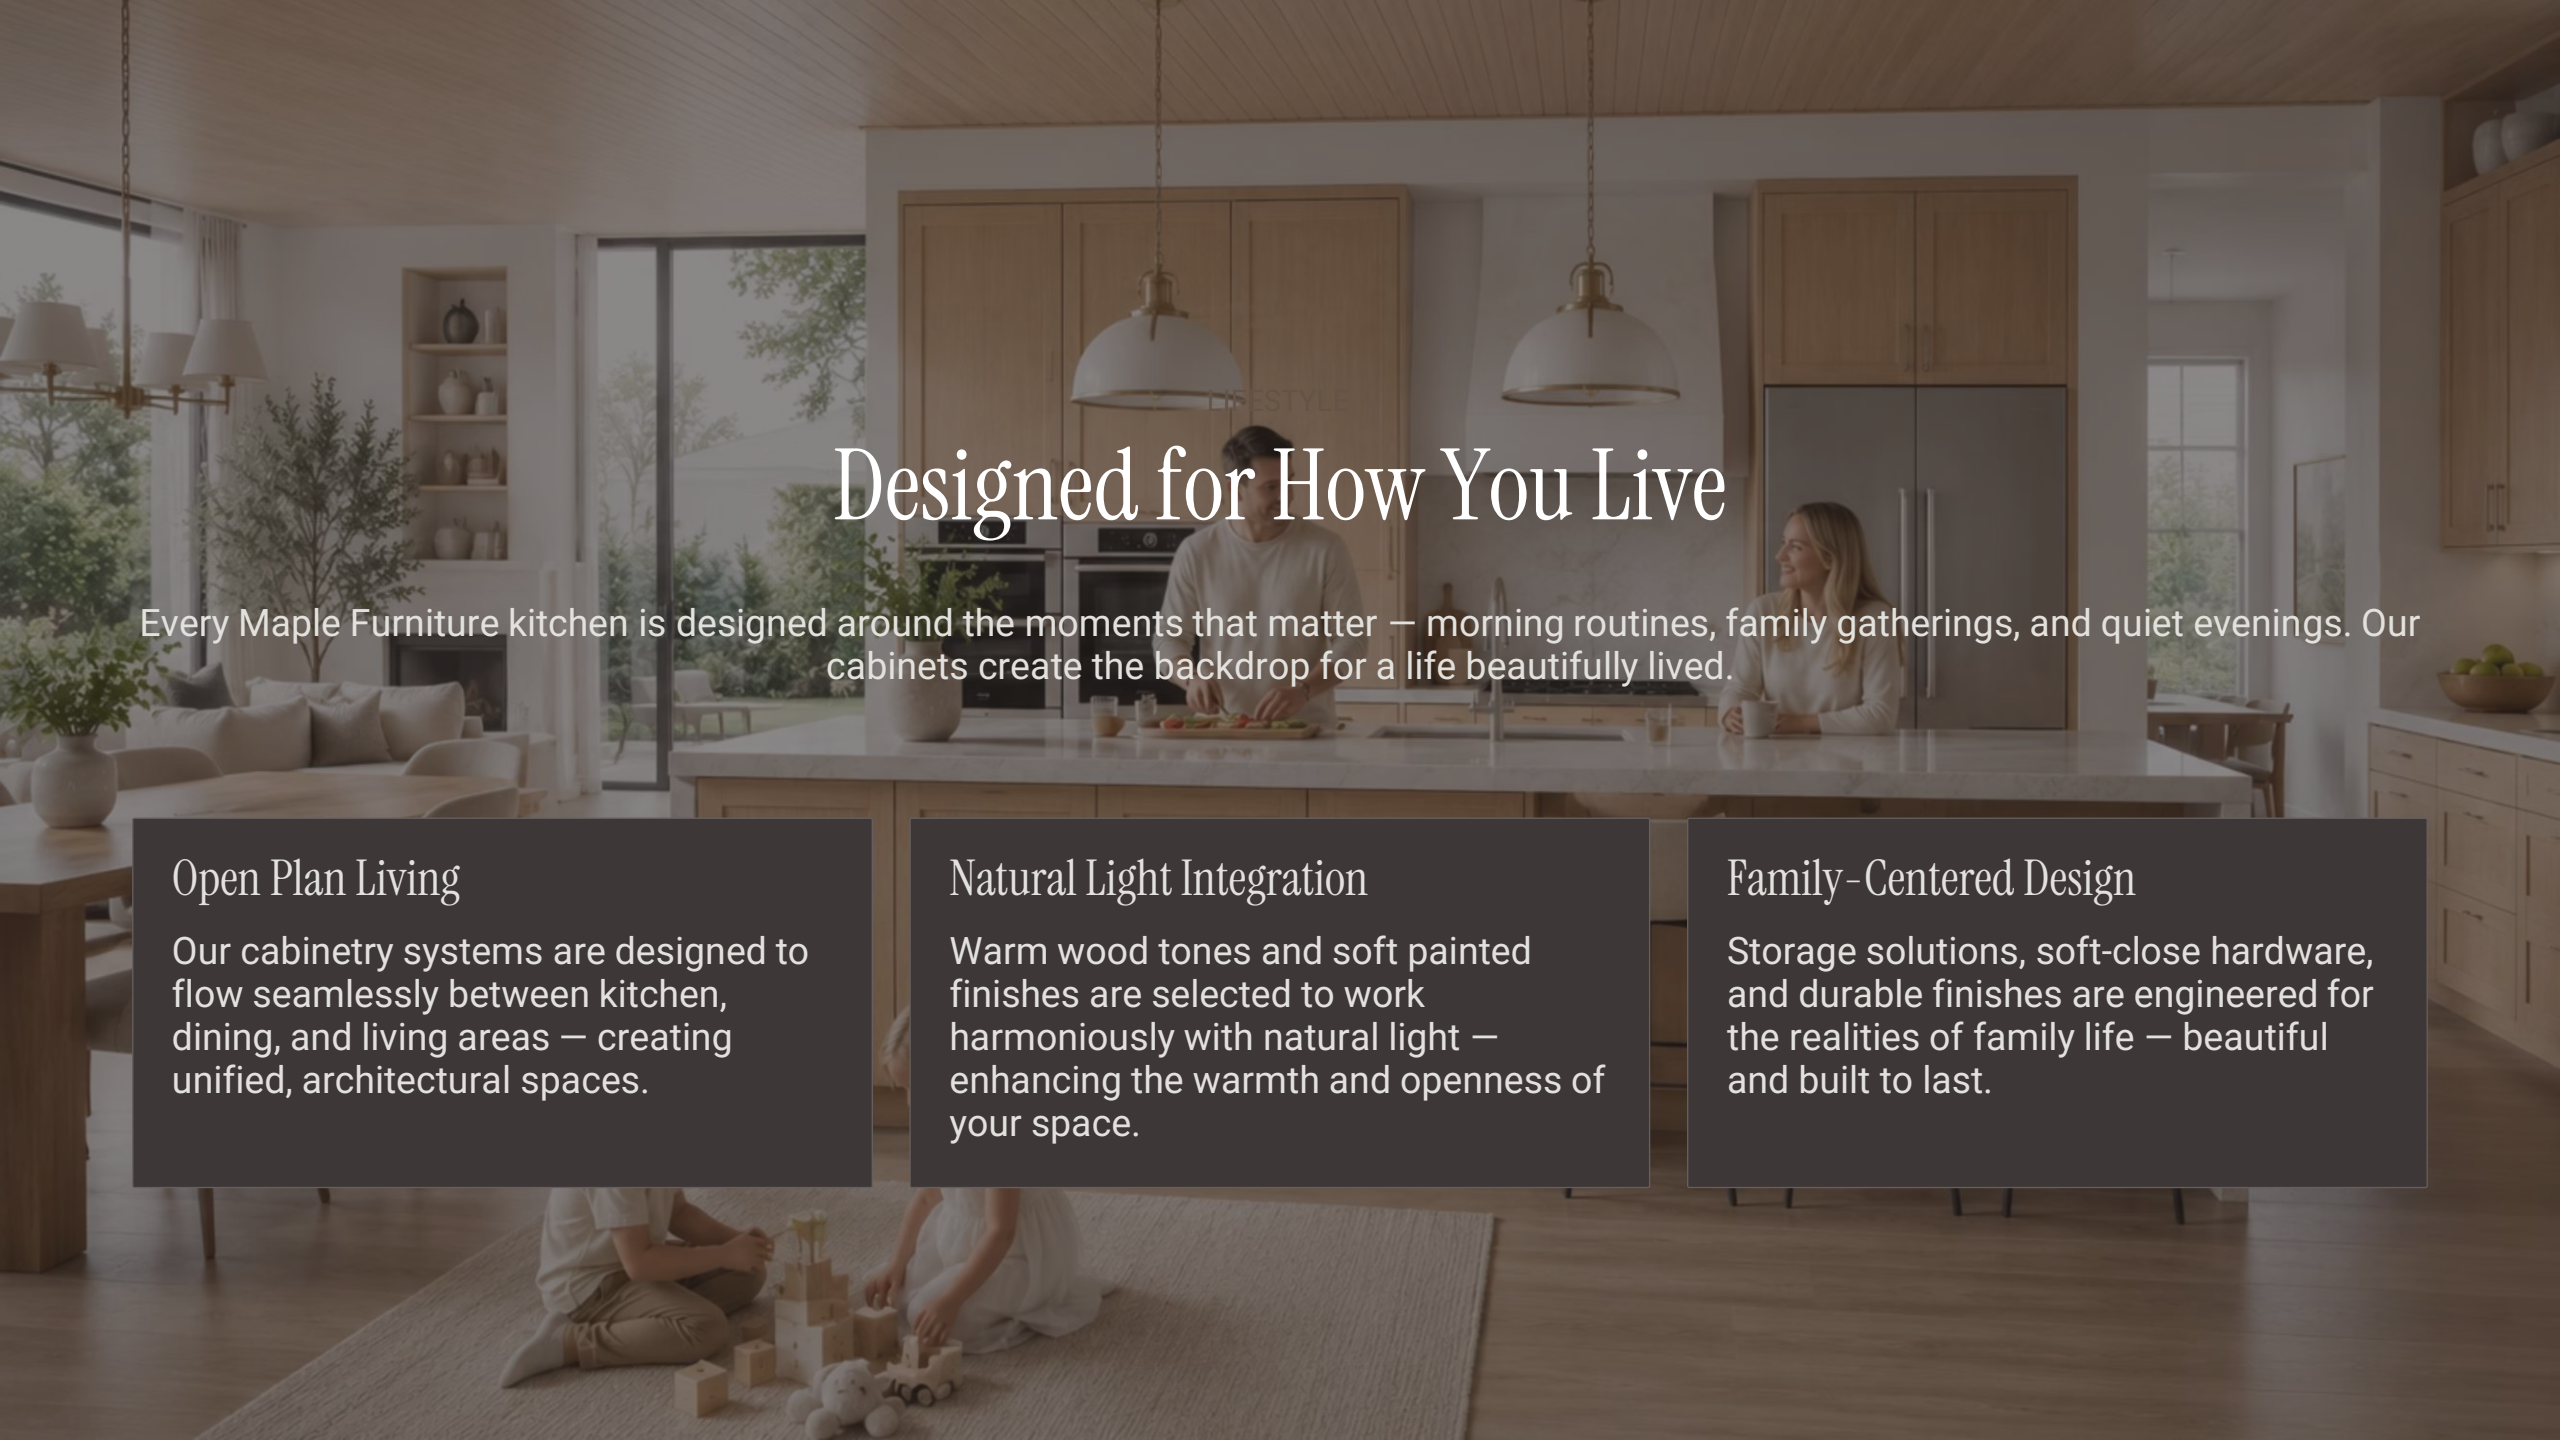

Lift Systems

Pneumatic and servo-motor lift mechanisms for upper cabinet doors — enabling seamless handle-free access with one-touch operation.

Adjustable Leveling Legs

Plastic toe-kick leveling legs with ± 20 mm vertical adjustment. Allows precise installation across uneven subfloors without compromising alignment.

Designed for How You Live

Every Maple Furniture kitchen is designed around the moments that matter — morning routines, family gatherings, and quiet evenings. Our cabinets create the backdrop for a life beautifully lived.

Open Plan Living

Our cabinetry systems are designed to flow seamlessly between kitchen, dining, and living areas — creating unified, architectural spaces.

Natural Light Integration

Warm wood tones and soft painted finishes are selected to work harmoniously with natural light — enhancing the warmth and openness of your space.

Family-Centered Design

Storage solutions, soft-close hardware, and durable finishes are engineered for the realities of family life — beautiful and built to last.

FOR ARCHITECTS & DEALERS

Your Manufacturing Partner

Maple Furniture works directly with architects, interior designers, kitchen dealers, and property developers to deliver custom cabinetry programs at scale. From single luxury residences to large multi-unit developments, we have the capability and commitment to deliver.

Custom Sizing

All cabinet dimensions are fully customizable to millimeter accuracy. Non-standard heights, widths, and depths are standard practice for our team.

Project Support

Dedicated project managers coordinate production scheduling, quality reporting, and delivery logistics for every significant contract.

Finish Customization

Custom RAL painted finishes, bespoke veneer matching, and unique laminate combinations are available for specification projects.

Technical Documentation

Full technical drawing packs, BIM files, cut lists, and specification sheets are available for all standard and custom products.

OEM / ODM Services

We manufacture under client brand labels and develop new product lines to bespoke client specifications for distribution programs.

Scalable Manufacturing

Our production capacity supports both boutique residential commissions and high-volume development programs with consistent quality standards.

DEALER RESOURCES

Supporting Your Success

We understand that the success of our dealers and architects is our success. That's why Maple Furniture provides an industry-leading support infrastructure — from first specification to post-installation.

Design & Specification Support

Our technical team works alongside your designers to optimize layouts, resolve specification challenges, and ensure every detail is confirmed before production begins.

Sample & Material Library

Physical sample packs, finish boards, and full-size door samples are available to all registered dealers and specification partners.

Reliable Delivery Programs

Scheduled delivery programs with advance lead time confirmation ensure your project timeline is protected from procurement through to installation.

After-Sales Service

A dedicated after-sales team handles replacement parts, warranty claims, and technical queries with speed and professionalism.
